Overall great professor enjoyed his class very much.
Providing practice quizzes and case studies to prepare me for test evaluations
providing lots of resources, practice quizzes, available help, clear notes, and he's very good at explaining content
Thank you AVINASH!!
Presenting the course content across multiple platforms and relating tough content to real life to break it down for his students.
Avinash is one of the greatest professors I have been taught by. The videos he uploaded to blackboard that aligned with the in class lectures with more detail were extremely beneficial to my learning and helping the information stick. He is very kind and approachable. He always answers questions, even during break, and elaborates and explains how and why in terms and ways that are easy to understand.
Giving enough examples and slides to support my learning
Providing the student with learning outcomes as an outline of what to expect to be tested on as well as providing practice quizzes for most chapters/units as a way of testing our learning so far.
giving us practice quizzes. he also is very knowledgeable. its obvious he knows the material and exponentially more than what is taught in class

No room for improvement.
Allowing more quizzes that will allow high grades
I wish he had given us examples of how he wanted the case studies to be formatted but other than that I think he was an amazing professor and I hope to have him as my professor next semester.

What recommendation(s) would you make to improve this course?

Comments
NA
None. It is perfect the way it is.
Allow more Practicals or Laboratory
I believe this course is great the only thing I wish to be changed is the textbook I found it to be a bit confusing and it did not really seem to fully line up with what we were learning in class.
