BEGINNING OF THE COURSE

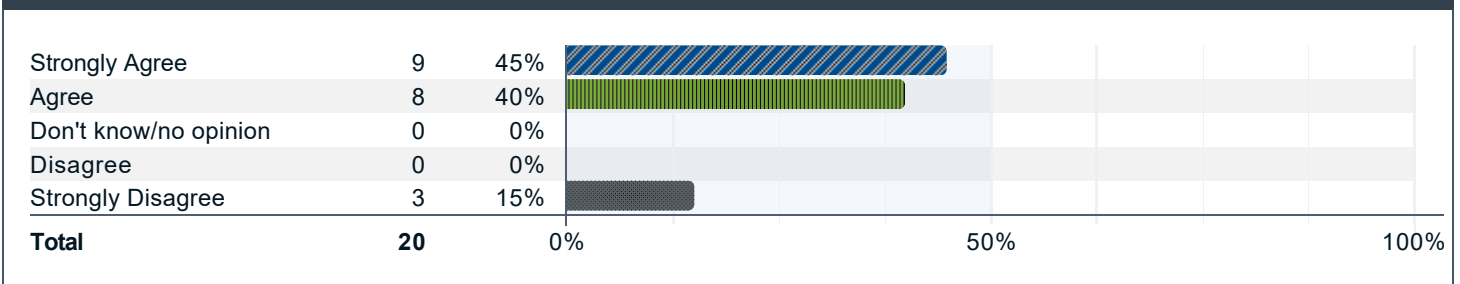

DURING THE COURSE

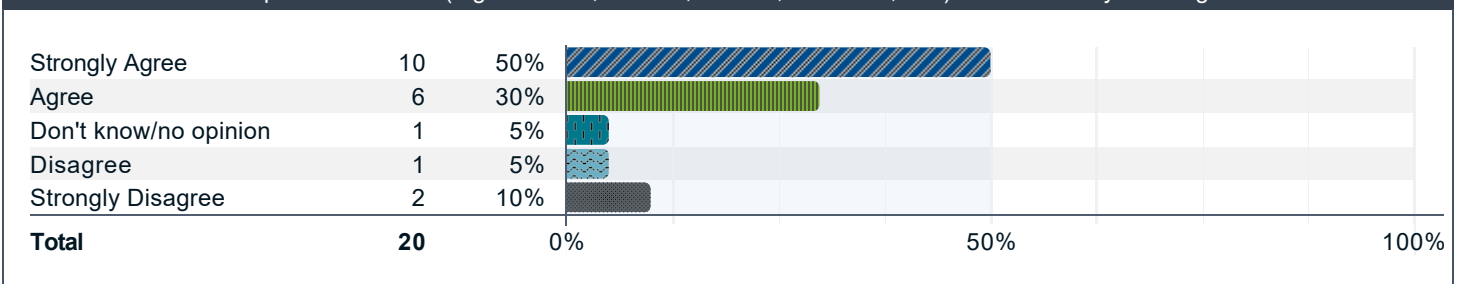

1. The delivery method described in the course syllabus/outline is followed (e.g. the amount of time the professor spends teaching per week, whether class is delivered in-person, online, hybrid, or GC Flex, etc.)

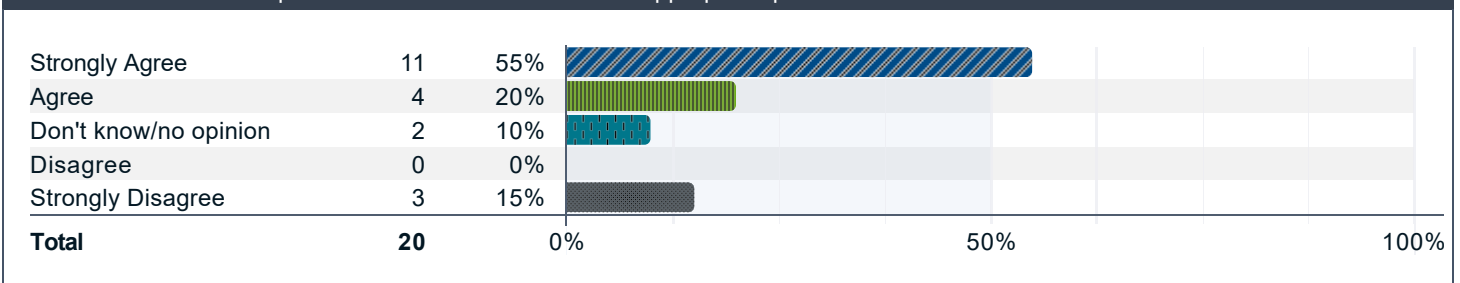

2. The variety of learning activities (e.g. presentations, projects, discussions, group work, etc.) help me to learn and engage with the course content

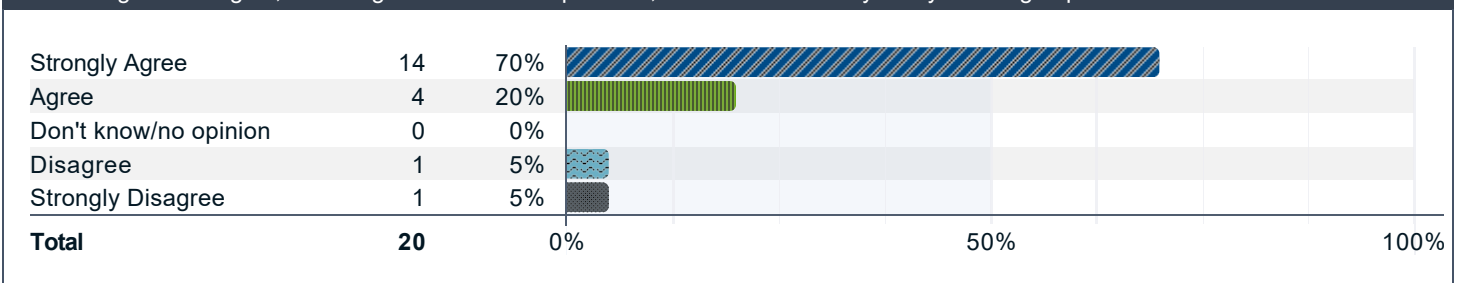

3. I find the course's required resources (e.g. textbook, manual, articles, handouts, etc.) valuable to my learning

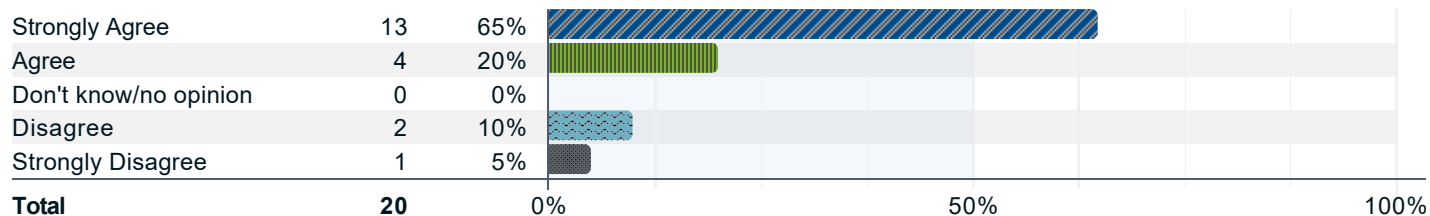

4. The course content is presented or demonstrated at an appropriate pace

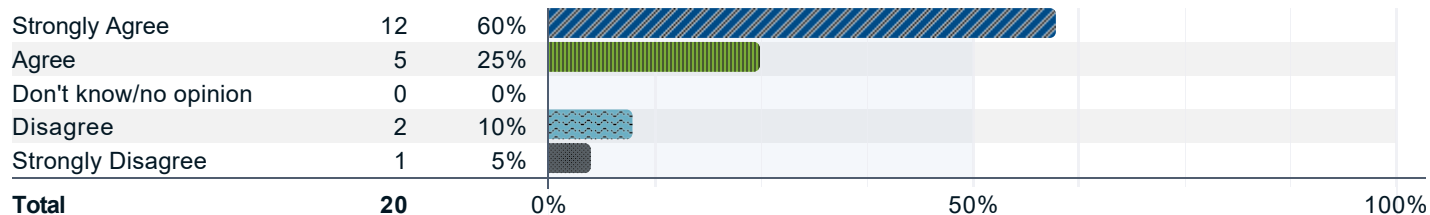

5. Learning technologies, including the Blackboard platform, are used effectively in my learning experience

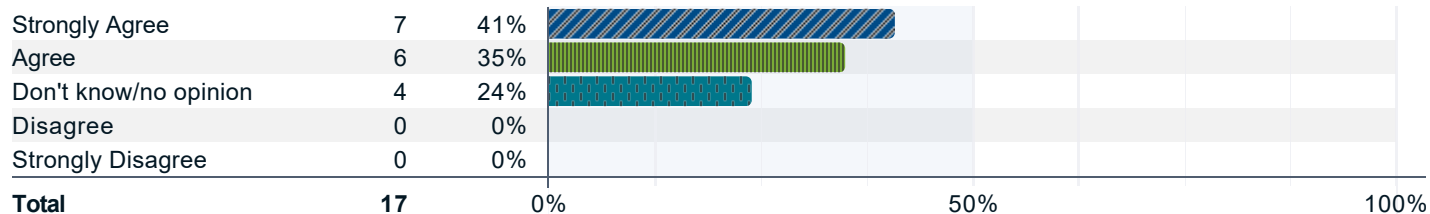

6. I am encouraged to engage and ask questions

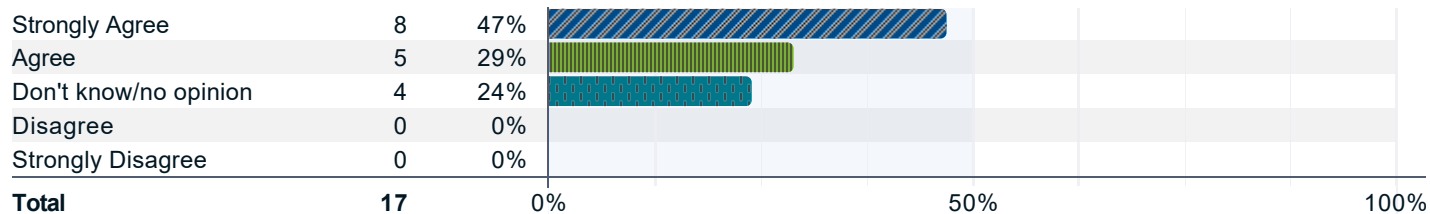

7. The course content is structured/presented in a logical order

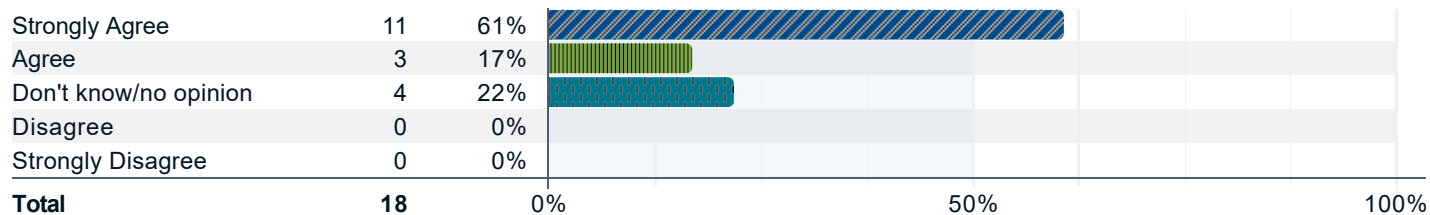

1. The professor provides their expectations for student success in the course

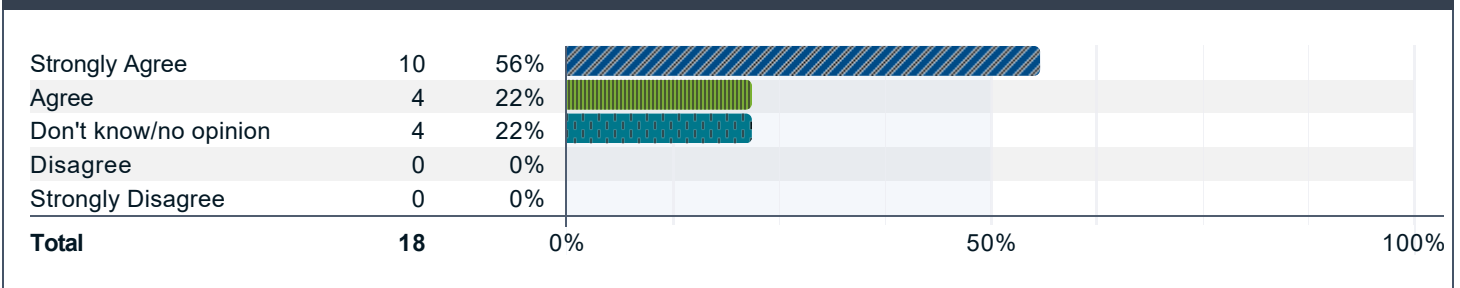

2. The professor is prepared for each class

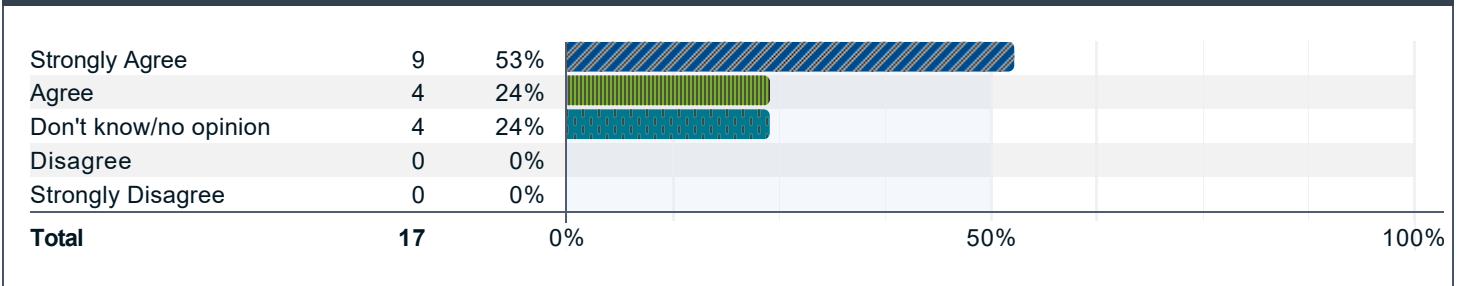

3. The professor explains content in a way I can understand

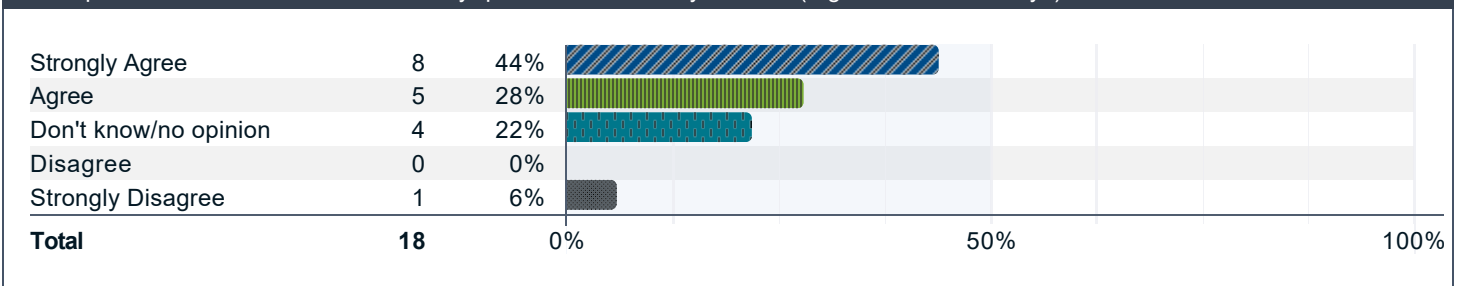

4. The materials used by the professor in the course (e.g. presentations, handouts, videos, websites, etc.) help me to understand the course content

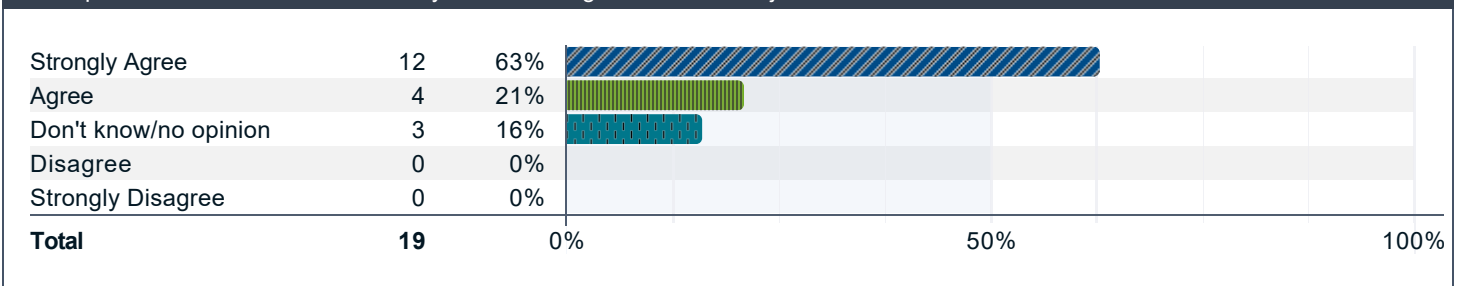

5. The professor informs me of, or directs me to, the appropriate resources/services (e.g. advising, library, peer services, etc.) as necessary

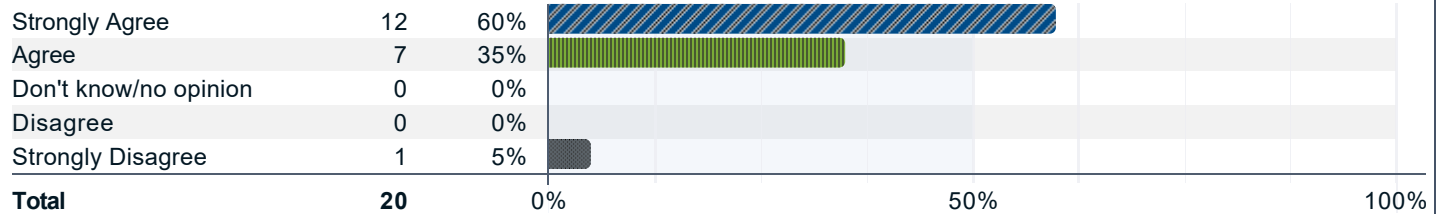

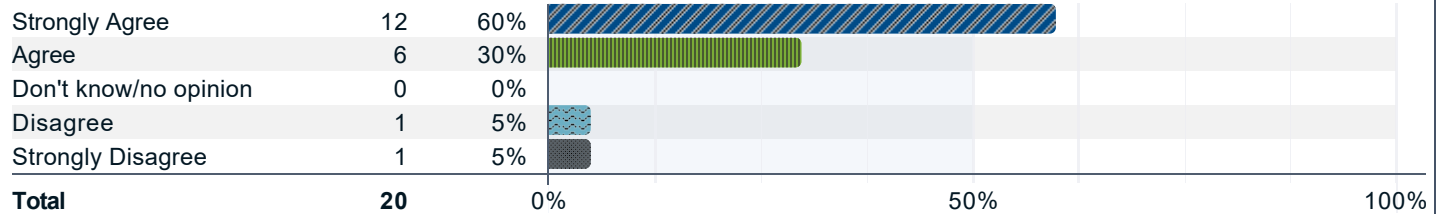

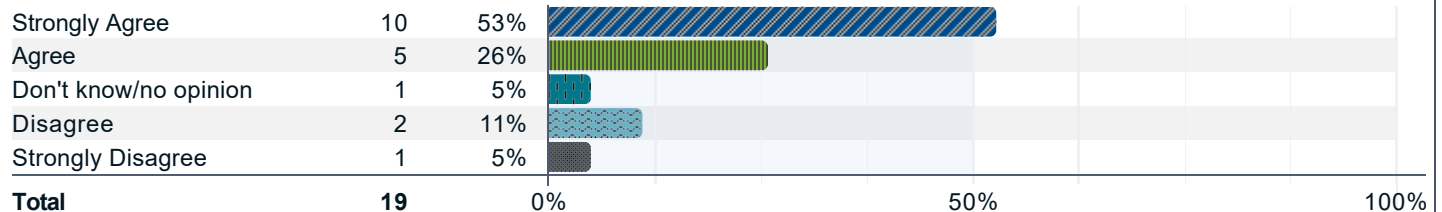

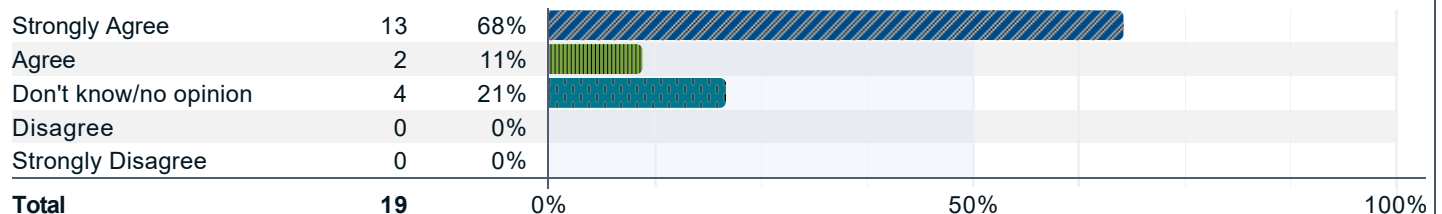

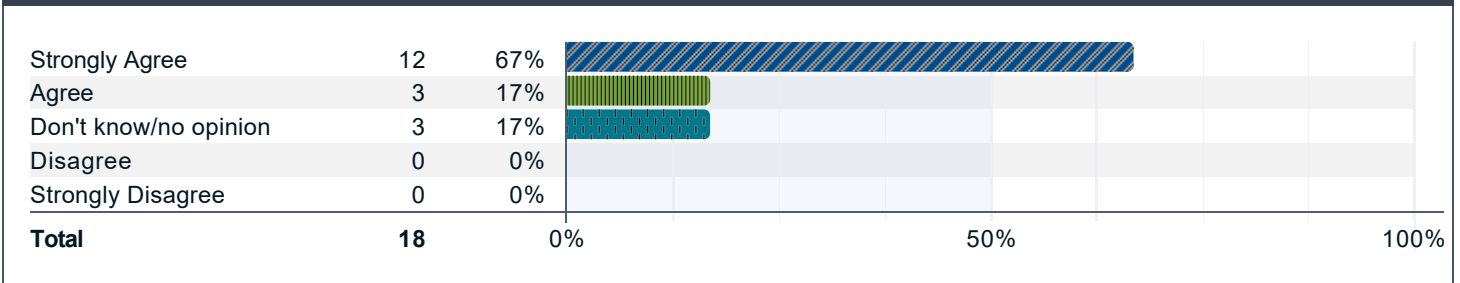

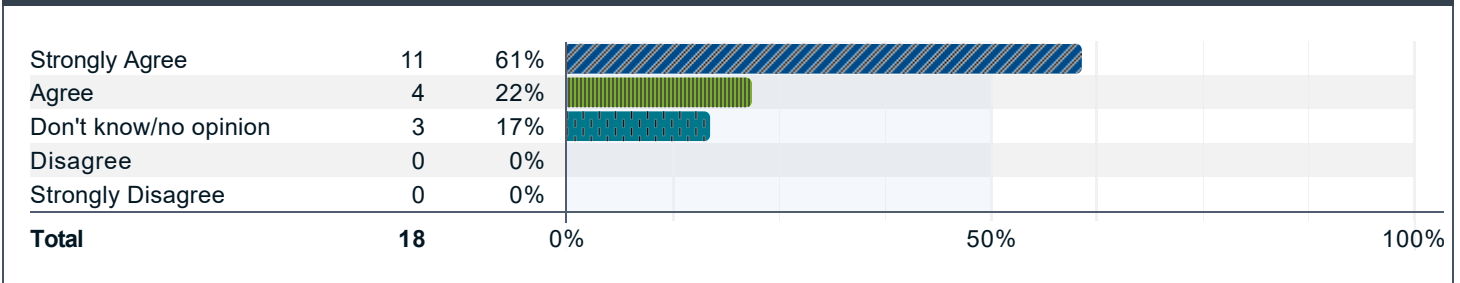

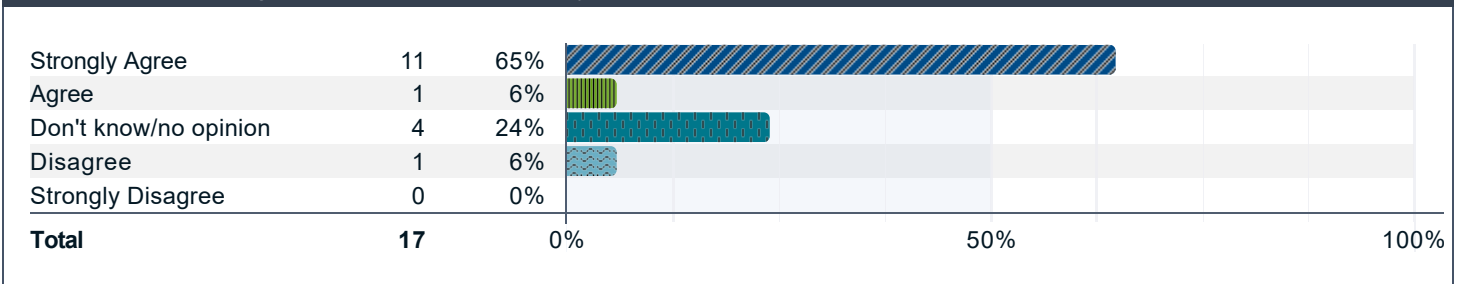

6. The professor is available to answer my questions in a timely manner (e.g. 1-2 business days)

7. The professor demonstrates that they are knowledgeable of the subject matter

EVALUATION**1. The evaluation methods (e.g. tests, assignments, reports, etc.) described in the course syllabus/outline are followed****2. The evaluation methods (e.g. tests, assignments, reports, etc.) help me to understand the course content****3. I am provided with feedback on my work that benefits my learning****The professor returns evaluations (e.g. tests, assignments, reports, etc.) within two weeks, or the time specified by the professor**

CLASSROOM ATMOSPHERE**1. The professor shows interest in the course content****2. The professor cultivates an environment of mutual respect****3. The professor manages class behaviour effectively**

Comments
Dr. Thadani has been an incredibly helpful instructor throughout this course. His PowerPoint presentations on each weekly subject were clear, detailed, and very useful in supporting my learning. I found them to be an excellent resource that helped me better understand the material. I'm really glad we had the opportunity to learn from him, as his style of teaching made the content much easier to follow.
In contrast, I found the Microsoft team meetings with Professor Taverner less informative and somewhat rushed, which made it more difficult to fully grasp some of the concepts. Dr. Thadani's approach was more structured, and his presentations were an invaluable aid in my studies.
Dr. Thadani was also very fair with grading, which made me feel confident that the assessments were an accurate reflection of our understanding. That being said, I do wish Dr. Thadani could have been a bit more involved in the live sessions. I feel his clear and concise delivery would have been beneficial to have in those sessions as well.
Overall, Dr. Thadani was an excellent instructor, and I appreciate the opportunity to learn from him. I think his presence in the Microsoft team meetings would have further enhanced the learning experience, but his narrated PowerPoints and teaching materials were extremely beneficial.
We were provided Professor Thadani's audio lecture for the patho class. This helped us a lot as a source to focus on for that course as nothing seems sense during the online class for patho. Thank you Professor Thadani you explained all the course materials very well. We all were hoping that you were our patho Professor. Thank you again. Happy holidays
His very well done slides
Continue bringing your expertise to share with the classroom. The powerpoint contents from weeks 1 – 6 that you provided were very very helpful and easy to follow.
He is a wonderful Professor, I would love to have him back for any class
n/a
Providing feedback and extra learning opportunities that were lacking in the course.
Voice over powerpoint was helpful
Putting up clear narrated videos that helped me deepen my understanding

The professor could provide further support for student learning by...

Comments
Being more involved in the class as he was very informative when narrating the PowerPoints.
In addition to the powerpoint weeks continue from weeks 1 –6. I believe weeks 7 – 11 Microbiology will be a great addition for resources for students. Otherwise, thank you Dr. Thadani for your incredible notes.

Being the Patho teacher!

What recommendation(s) would you make to improve this course?

Comments
See reviews for pathophysiology and microbiology above.
Lock down Microsoft teams!!!! Too many times students would mess with the profs and mute them or other classmates. Too distracting.
Please make it in class! Students , I need this course in class not online! Too much information that has to be properly explain in class. None of the teachers did a good job on having a flow between online class and them
Nothing.
n/a
It was a great semester!
It should in be in person, less information, way too much course information in short term, there is nooooo resources to help us learn, online leaning is not suitable for such a hard course! There is never a review and we are up to to discuss 200 diseases that could be on the tests
This course should be in-person
Have Olga and Avinash teach the course together. They make great team
