Response Ratio	29%

BEGINNING OF THE COURSE

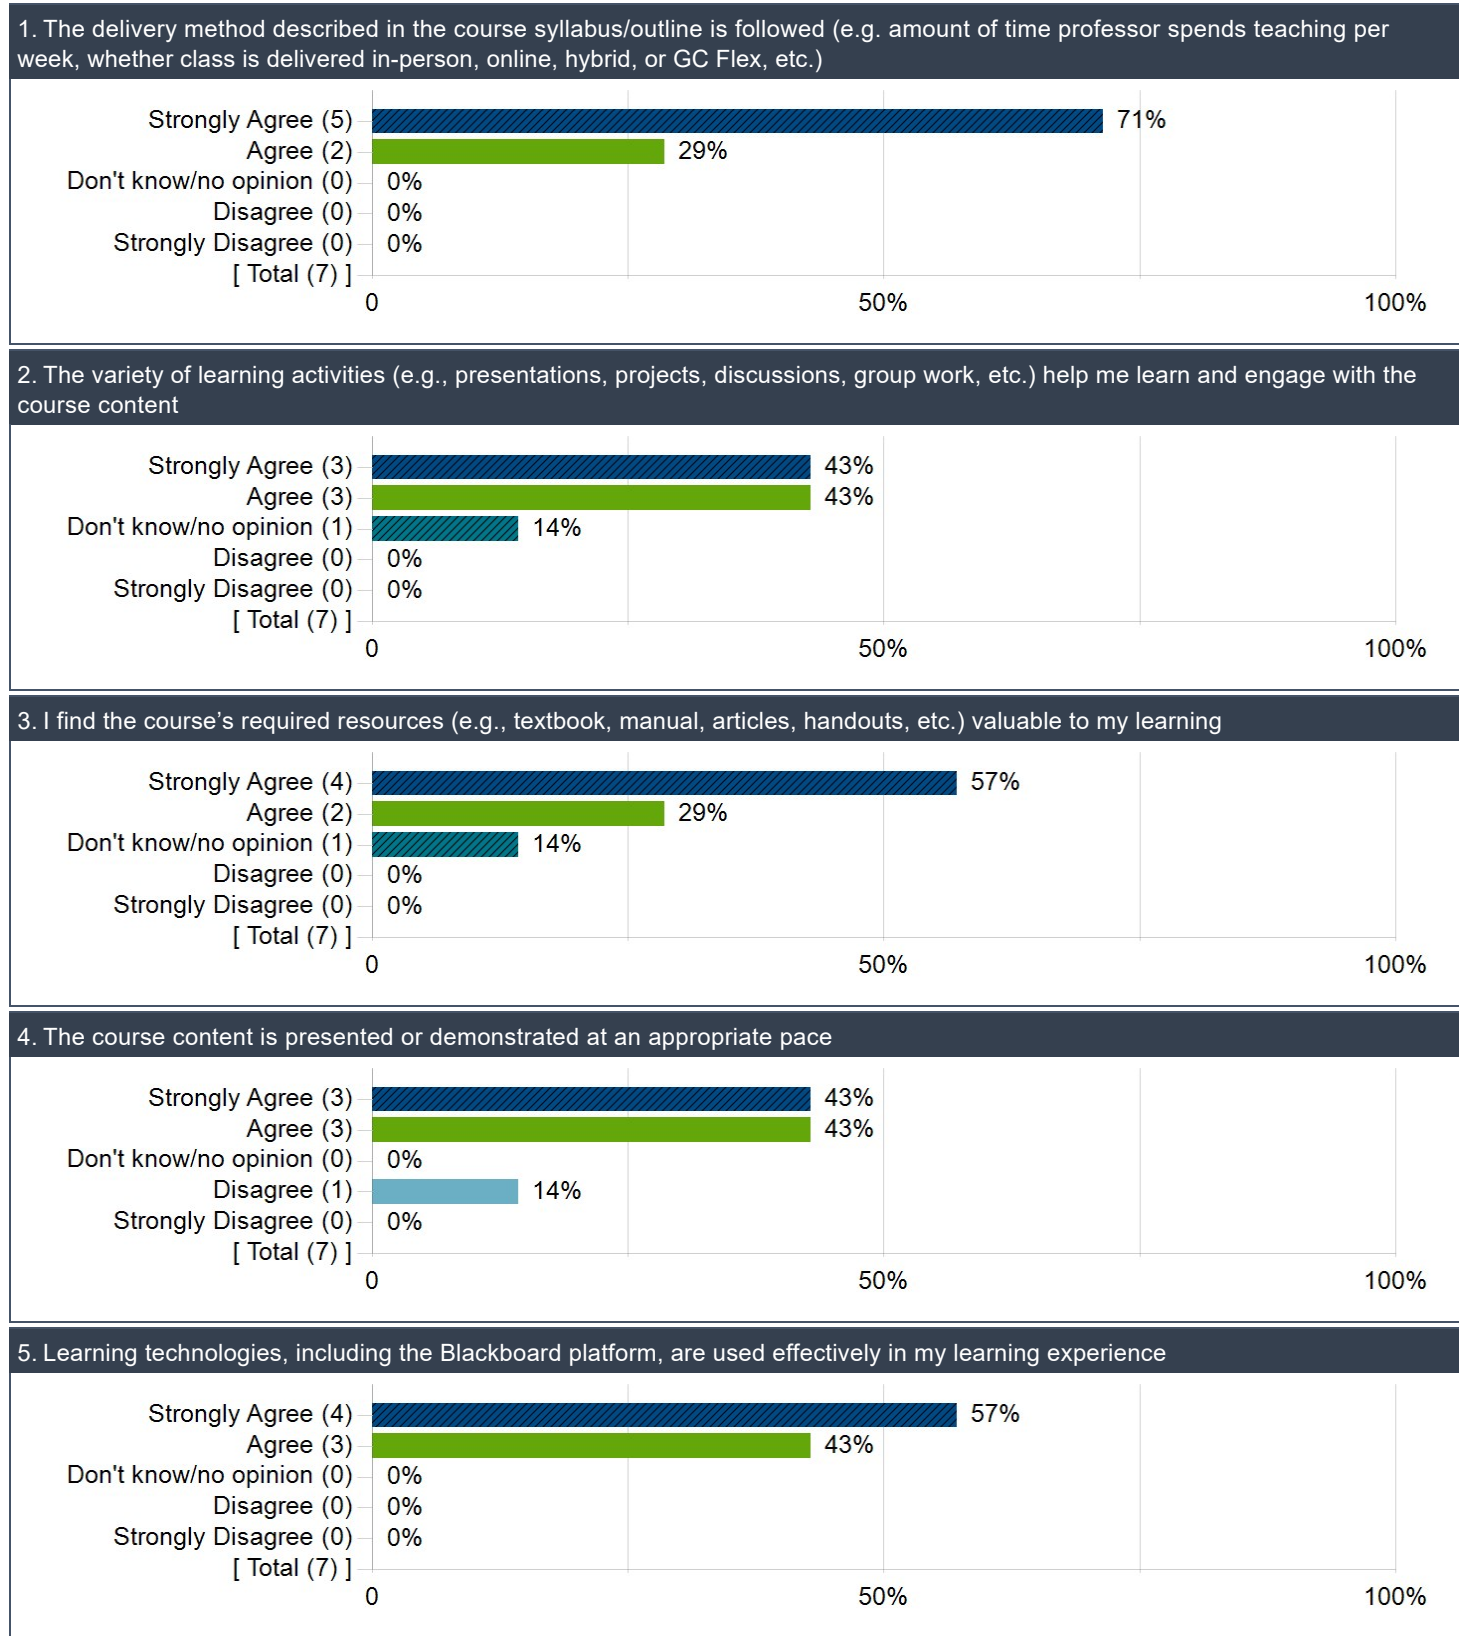

I was provided expectations of the course within the first week (e.g. course outline, course syllabus, academic integrity, faculty availability, etc.)

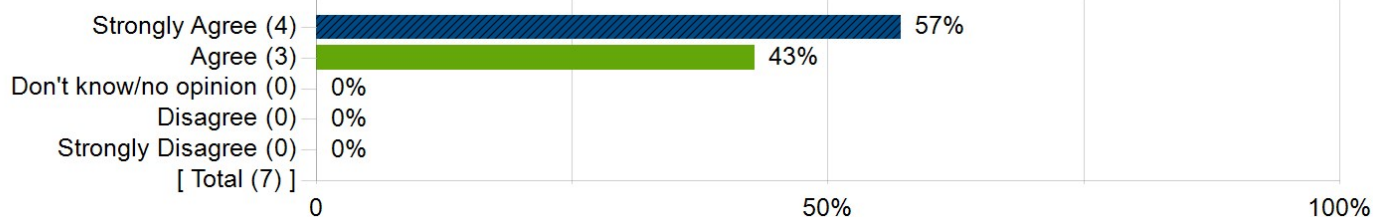

The professor provided the breakdown of the evaluation methods (e.g. tests, assignments, reports, etc.) in the course

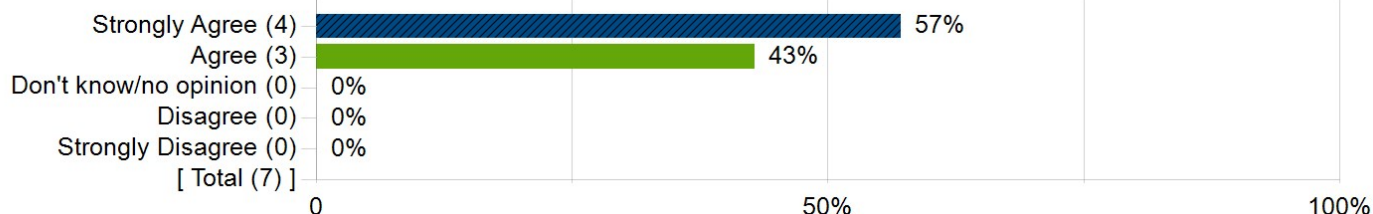

DURING THE COURSE

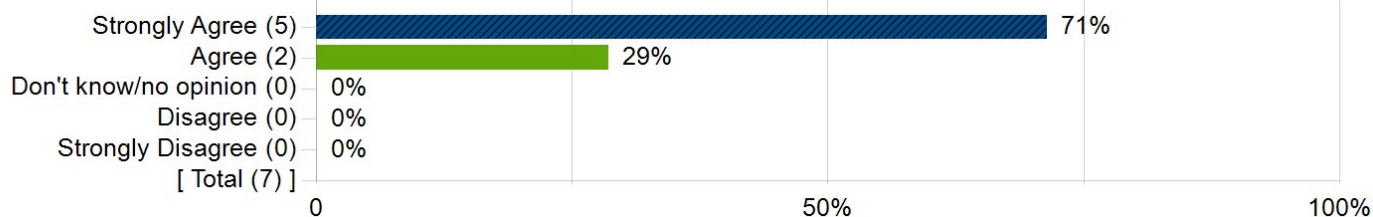

6. I am encouraged to engage and ask questions

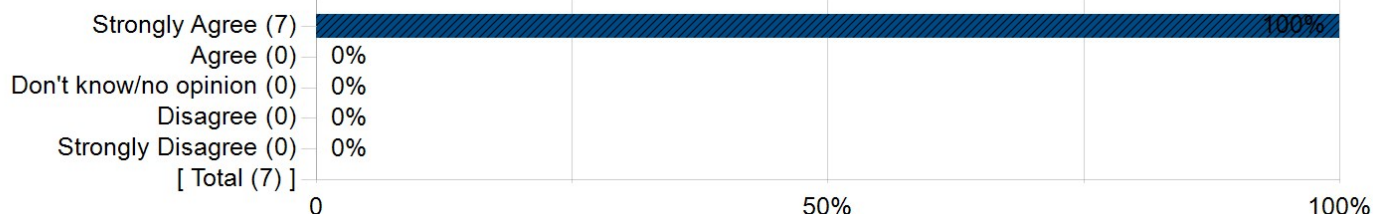

7. The course content is structured/presented in a logical order

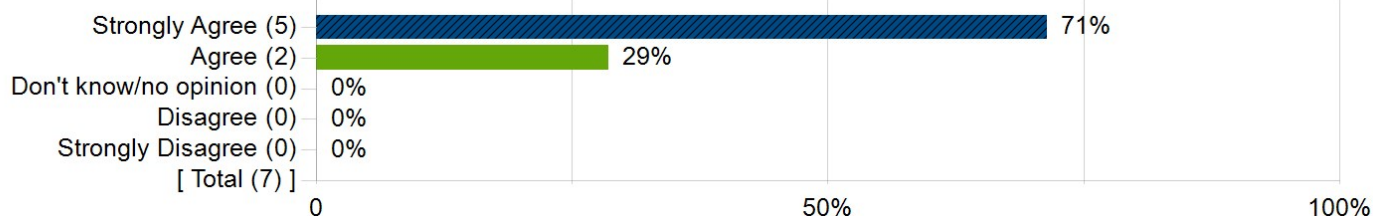

1. The professor provides their expectations for student success in the course

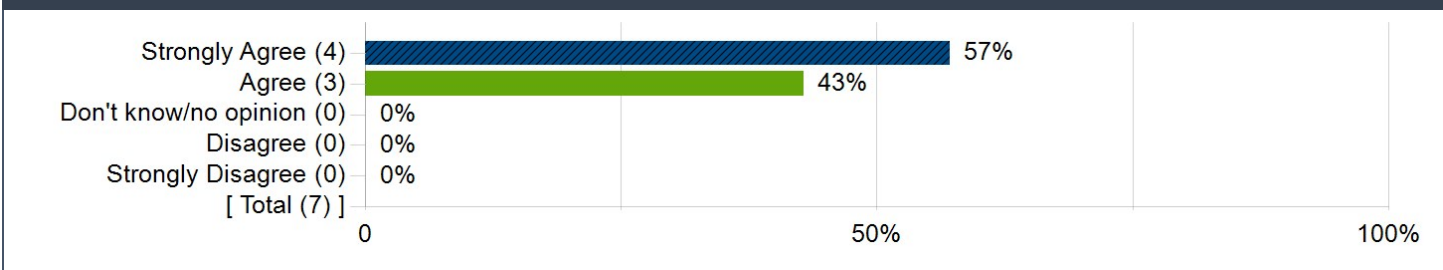

2. The professor is prepared for each class

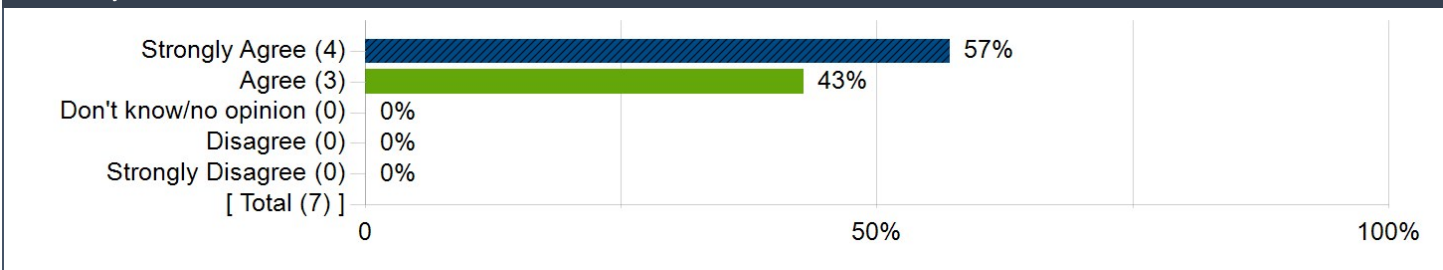

3. The professor explains content in a way I can understand

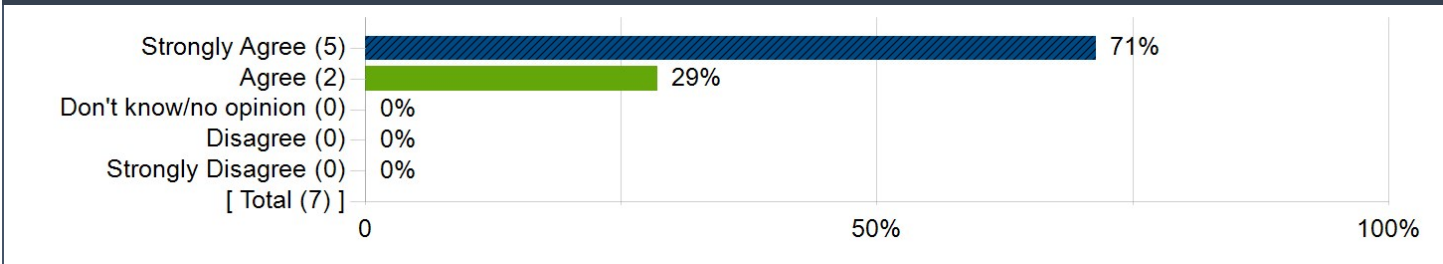

4. The materials used by the professor in the course (e.g., presentations, handouts, videos, websites, etc.) help me understand the course content

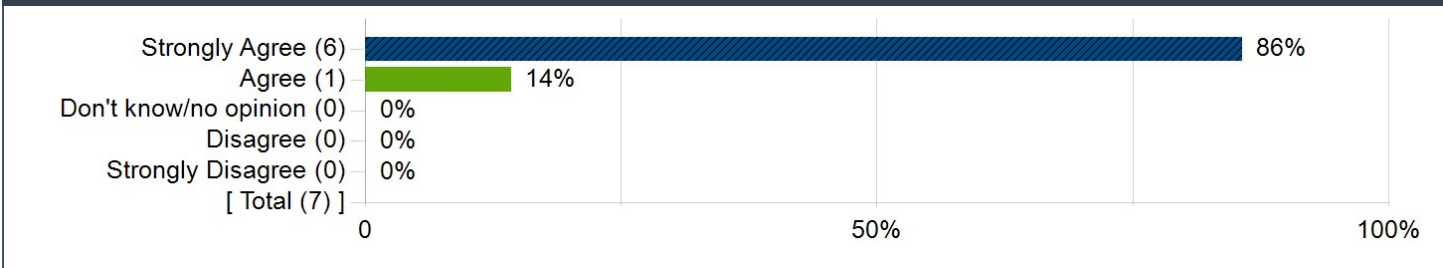

5. The professor informs me of, or directs me to, the appropriate resources/services (e.g., advising, library, peer services, etc.) as necessary

6. The professor is available to answer my questions in a timely manner (e.g. 1-2 business days)

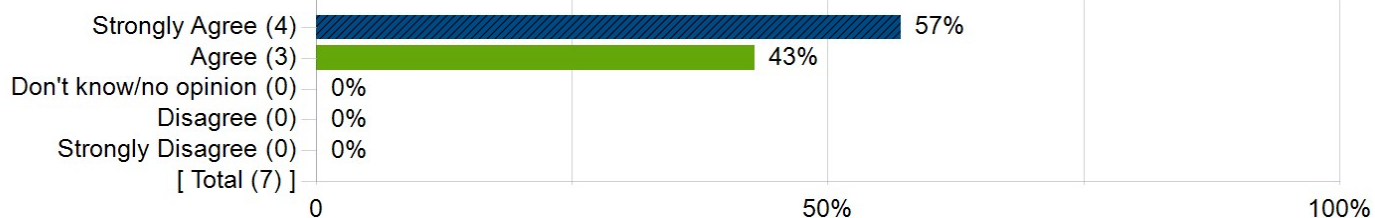

7. The professor demonstrates that they are knowledgeable of the subject matter

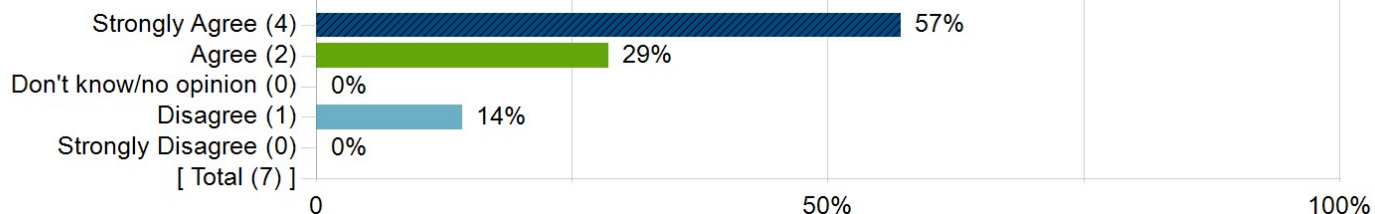

EVALUATION

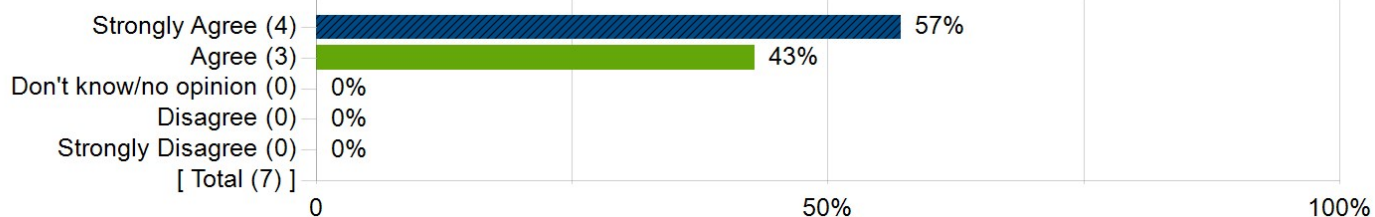

1. The evaluation methods (e.g. tests, assignments, reports, etc.) described in the course syllabus/outline are followed

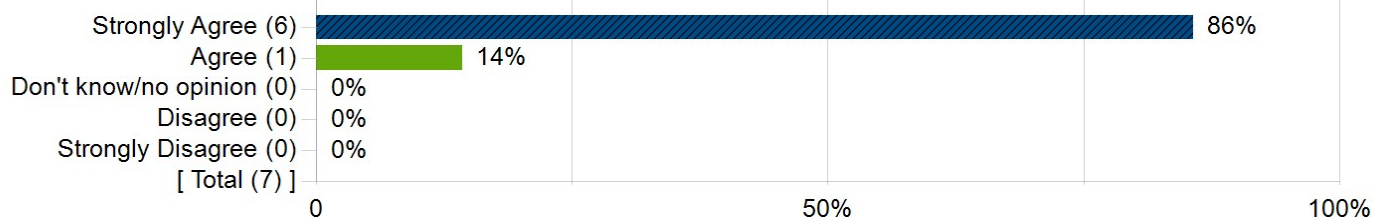

2. The evaluation methods (e.g. tests, assignments, reports, etc.) help me understand the course content

3. I am provided with feedback on my work that benefits my learning

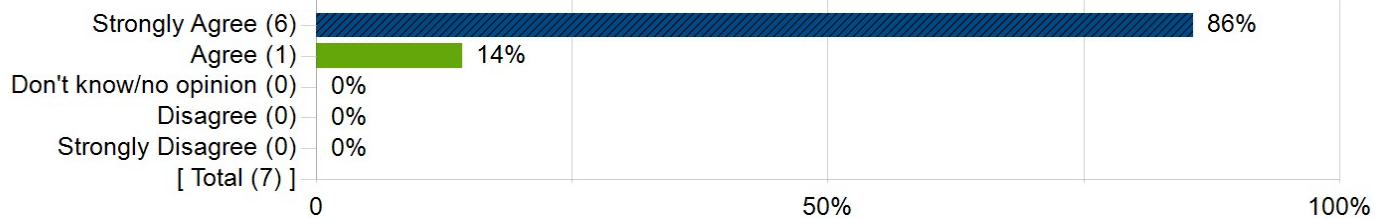

The professor returns evaluations (e.g. tests, assignments, reports, etc.) within two weeks, or the time specified by the professor

CLASSROOM ATMOSPHERE

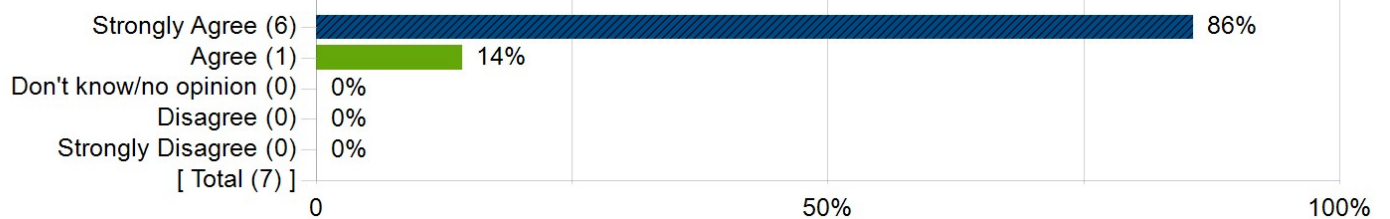

1. The professor shows interest in the course content

2. The professor cultivates an environment of mutual respect

3. The professor manages class behaviour effectively

The professor has supported my learning by...

Comments
Teaching for variety of learning styles
Always taking time to explain concepts or ideas when they are not understood by the entire class.
always answering my questions and emails
Professor Avinash recoded video helps me to understand my learning outcomes.
His lectures are superb! Very energetic, engaging and interesting. All the course materials provided. Can't afford to miss his lectures, please never let him leave (atleast for next 4 years). I have never seen such a knowledgeable professor who teaches so well as his passion! highly respectable person.

The professor could provide further support for student learning by...

N/A
I'm a very visual learner, sometimes I wish there were more pictures or visual materials to explain the concepts a bit more.
Having more practice quiz
He provides every resource to support my learning and answers all my questions.

What recommendation(s) would you make to improve this course?

Comments
No more cadaver videos until after we have learned and labelled the systems
I don't have any recommendations, however, I appreciate the fact that A&P and Pathophysiology are synchronized to the same systems during the same week.
I understand the rationale of having an understanding of anatomy and patho physiology in first year prior to clinicals however I wish there was more time to be able to spend on the concepts. It's a great class it just feels like there is a great deal of information squeezed into a few weeks and not enough time, especially this semester with the cardiac and respiratory systems. Personally I would enjoy more hands on 'labs' such as the ecg to be able to tie the concepts together in an interesting and concrete manner.
Having a practice quiz after every class to get a better understanding about the learning outcomes.
There is no need for any improvement, I think everything in his courses (anatomy and pathophysiology) is perfect!
