BEGINNING OF THE COURSE

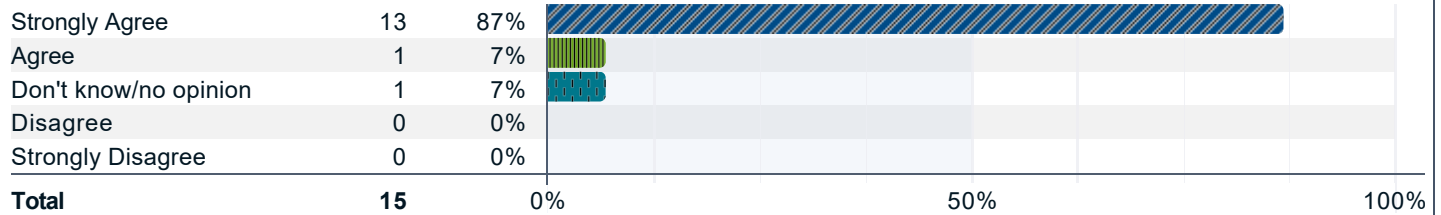

DURING THE COURSE

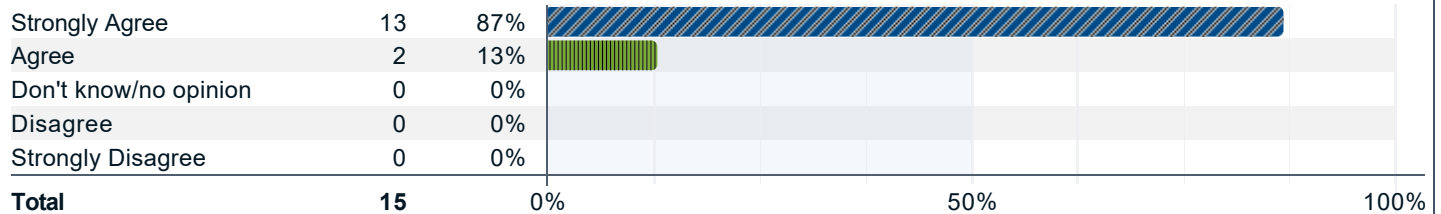

6. I am encouraged to engage and ask questions

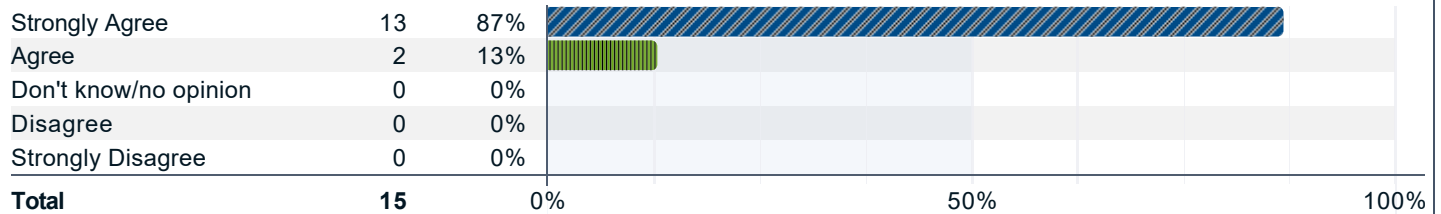

7. The course content is structured/presented in a logical order

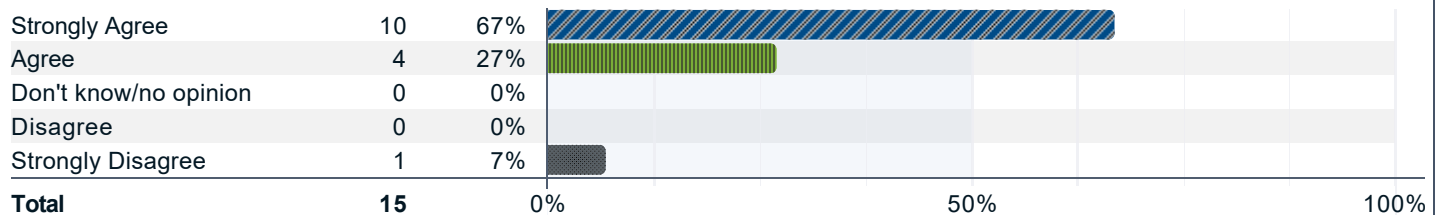

1. The professor provides their expectations for student success in the course

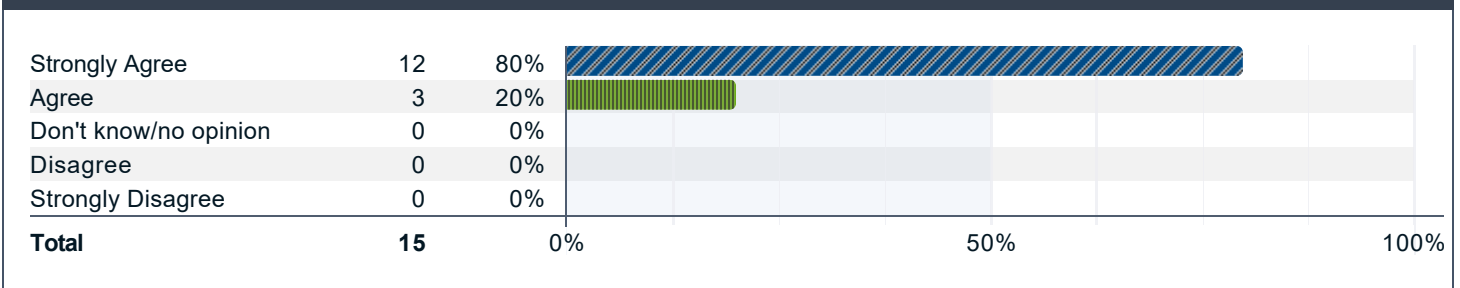

2. The professor is prepared for each class

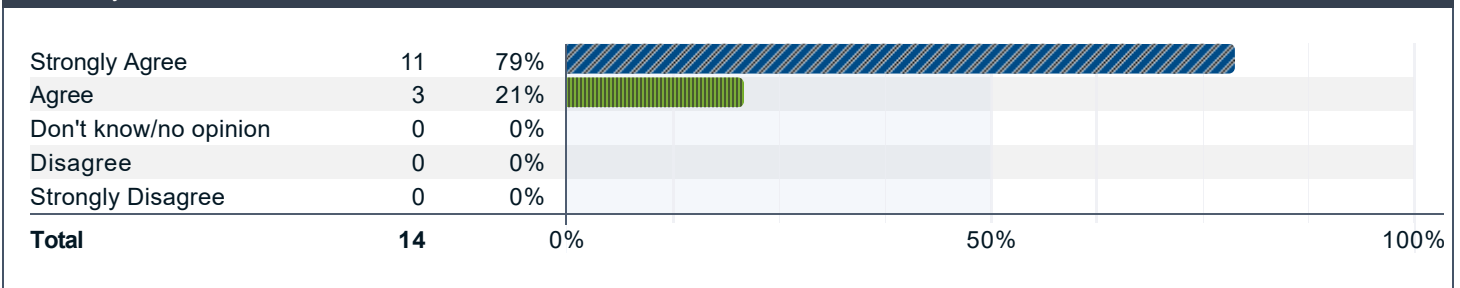

3. The professor explains content in a way I can understand

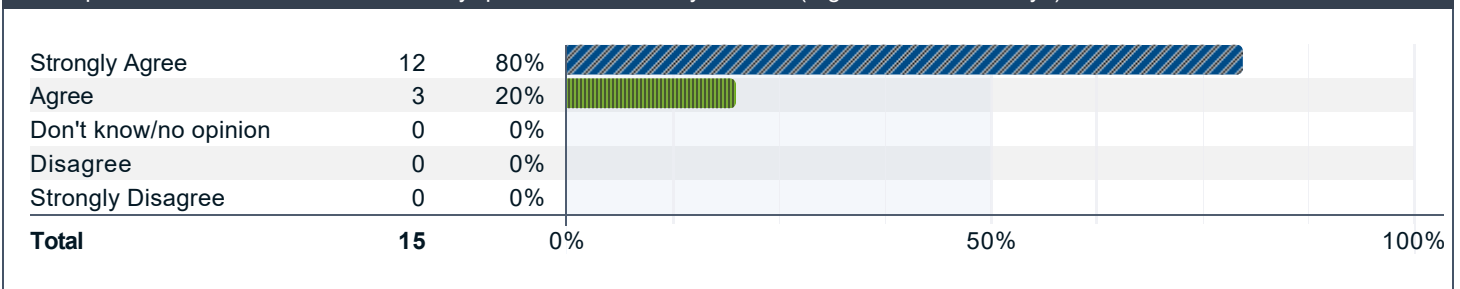

4. The materials used by the professor in the course (e.g. presentations, handouts, videos, websites, etc.) help me to understand the course content

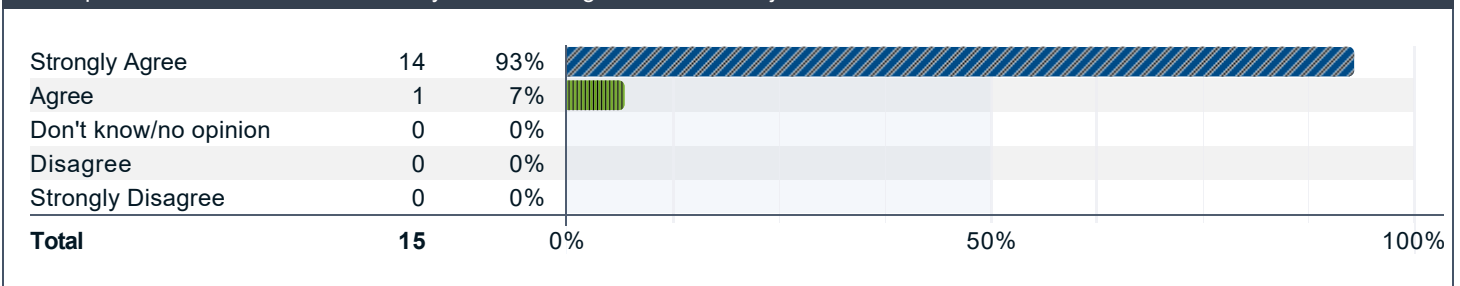

5. The professor informs me of, or directs me to, the appropriate resources/services (e.g. advising, library, peer services, etc.) as necessary

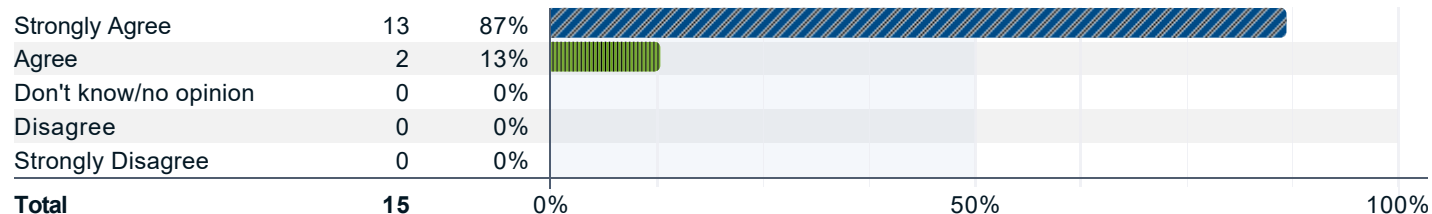

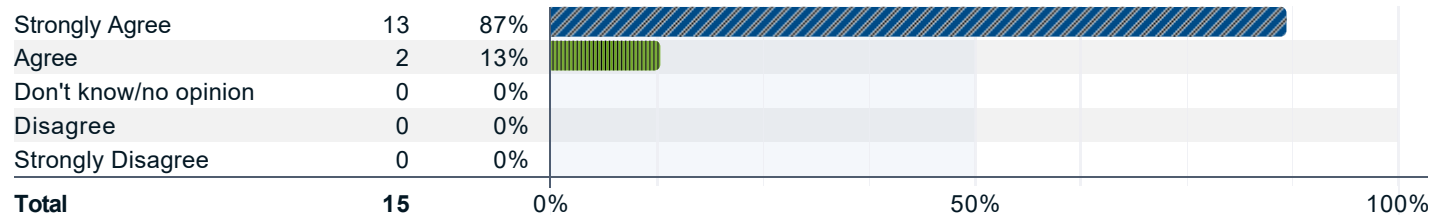

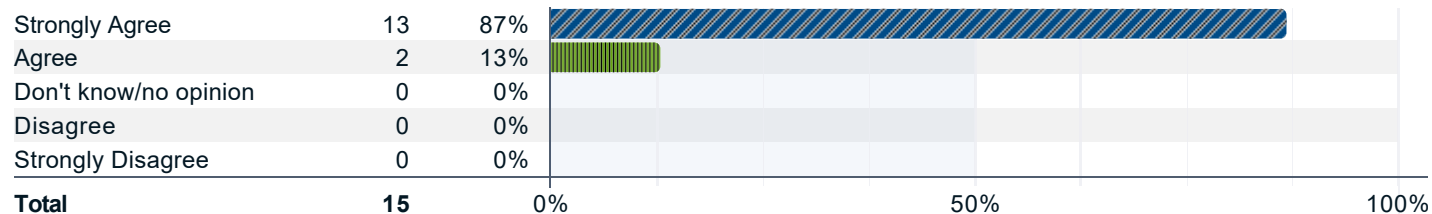

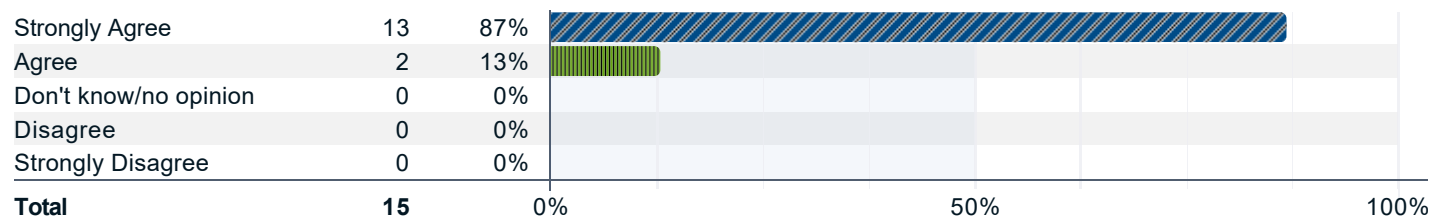

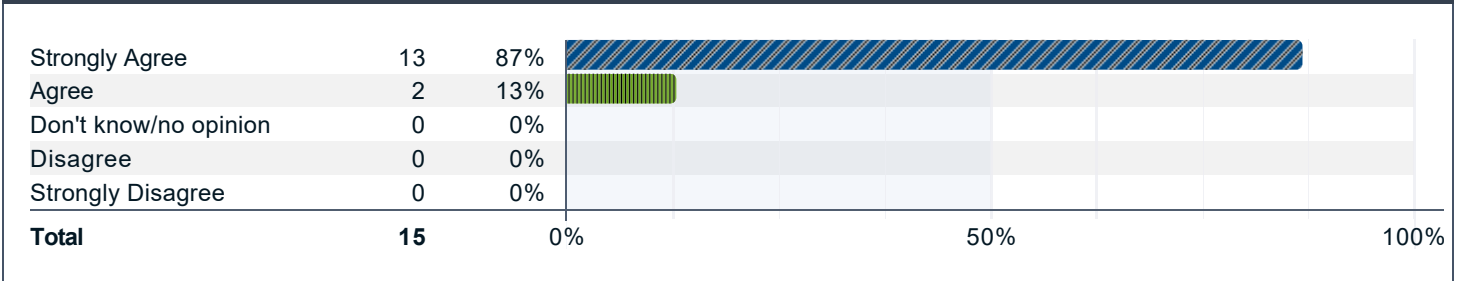

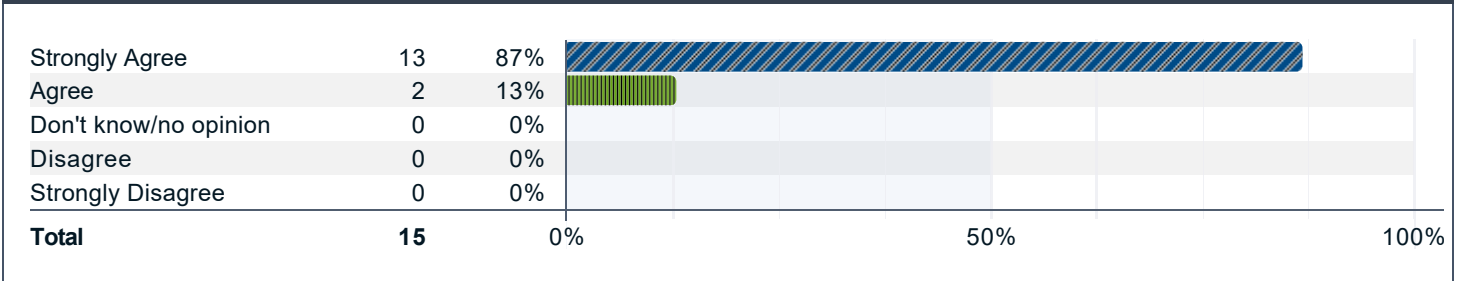

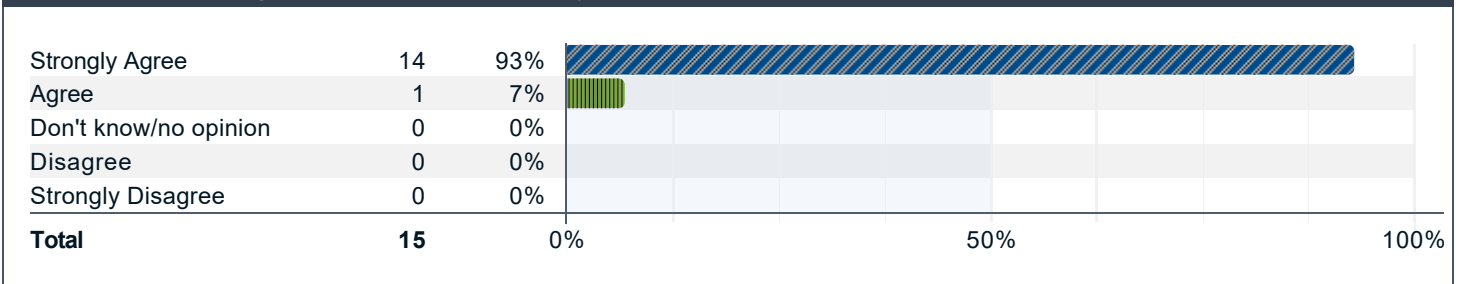

6. The professor is available to answer my questions in a timely manner (e.g. 1-2 business days)

7. The professor demonstrates that they are knowledgeable of the subject matter

EVALUATION**1. The evaluation methods (e.g. tests, assignments, reports, etc.) described in the course syllabus/outline are followed****2. The evaluation methods (e.g. tests, assignments, reports, etc.) help me to understand the course content****3. I am provided with feedback on my work that benefits my learning****The professor returns evaluations (e.g. tests, assignments, reports, etc.) within two weeks, or the time specified by the professor**

CLASSROOM ATMOSPHERE**1. The professor shows interest in the course content****2. The professor cultivates an environment of mutual respect****3. The professor manages class behaviour effectively**

The professor has supported my learning by...

Comments
By providing a lot of resources such as practice questions, exam reviews, which were very helpful for learning, understanding, and retaining the content. I would like to thank and congratulate him for the great work he does.
Avinash provides so many resources to help students succeed! He provides us with practice exams, as well as weekly practice quizzes on Blackboard, so that we can check our learning and see what we may need to focus on more. He is also very knowledgeable and is able to answer any and all questions that students have. He also keeps us up-to date on current research
Always being available to answer questions, emails, and his way of teaching helps me always feel engaged in class!
Refer to my comments for Anatomy and Physiology 2.
Being extremely knowledgeable about course content, being passionate about the material being taught and caring for the success of his students. He has also always remained very personable and approachable.
It is evident that Avinash cares and wants his students to succeed. He provides several resources such as learning outcomes, class slides and regular slides, labeled diagrams, narrated videos to better understand course content, practice quizzes and exams, terms to know etc. He will always provide clear outlines, resources and never leave you confused of what will be on the exam. He is kind to approach and answers questions asked. His classes are engaging and he is a very highly talked about teacher.
Avinash is one of the most empathetic instructors that truly shows he cares about student success in all our courses.

The professor could provide further support for student learning by...

Comments
I think Avinash is a great guy and is very knowledgable in this course. But I think he is too advanced for first year nursing students. There were many times in class when he would tell us that we wouldn't need to know a certain topic and that it was too complicated but then he went on to talk about it for a long time, and it was not content in the learning outcomes. I did not go away from classes feeling like I understood the lecture and had to reteach myself almost every unit. I had a different professor in first semester for patho 1 and felt like I was lost this whole second semster as opposed to last semester where my prof would connect patho directly to the healthcare world and make it make sense. I know Avinash is not a healthcare provider, specifically a nurse, so this can impact the connections that could be made. I also found it extremely frustrating that he canceled our first class because he wanted to watch a hockey game (if there was family emergency, or health related issues, that is understandable but a canceling for a hockey game is very unprofessional and vexatious). Cancelling the first class threw us off for the rest of the semester with constant comments from Avinash about how he was so worried that we were behind every week, as if it was something we had done and could have changed/avoided. This was hardly conducive for us students, and this class is vital for our learning and understanding to become nurses, and I do not feel Avinash did it justice this semester.
N/A
Refer to my comments for Anatomy and Physiology 2.
Perhaps adapt different teaching styles, include more interactive videos and live surgeries/case studies during the lecture, than mostly only lecturing for the duration of class time.
Teach second, third and fourth year. Especially for pharmacology.
He does a wonderful job supporting student learning.

What recommendation(s) would you make to improve this course?

Comments
N/A :)
Refer to my comments for Anatomy and Physiology 2.
Though it is difficult to give a little more time for certain heavier units, it would benefit students if they felt some content wasn't as rushed and a little more time was spent, to fully understand it and not need to devote extra time after class (on top of the time already being devoted to go over the material and writing notes/studying), to understand topics.
