

Avinash Thadani, Ph.D.

EDUCATION

University of Toronto	Toronto, Ontario
Doctor of Philosophy (Medicinal Chemistry), 2001	
University of Toronto	Toronto, Ontario
Master of Science (Chemistry), 1998	
University of Toronto	Toronto, Ontario
Bachelor of Science (Hons.), Biochemistry, 1996	

ACADEMIC APPOINTMENTS

Georgian College	December 2011 - present
School of Health, Wellness and Sciences	Faculty – Full time
Nursing Degree Program (BScN), Pre-Health Sciences	
University of Windsor, Assistant Professor	July 2004 - November 2011
Department of Chemistry & Biochemistry	Faculty – Full time
Bachelor of Science Program	
University of Chicago, NSERC Post-Doctoral Fellow	July 2001 – June 2004
Department of Chemistry	

NON-ACADEMIC EMPLOYMENT

Thadani Consulting Services	July 2004 – June 2016
Consultant for the development of chemical and biochemical process for the efficient synthesis of precursor molecules for pharmaceutical agents. The main client was Kanata Chemical Technologies Inc. As a result of the consulting work, several new technologies were developed and patented (see Patents).	

ADMINISTRATIVE APPOINTMENTS

Chair, Georgian College Research Ethics Board	January 2023 – present
Overseeing and guiding the overall operations of the Georgian College Research Ethics Board (GCREB) including the submission, review, and revision of the ethics of course based and regular research applications with human participants in accordance with the guidelines of the TCPS2.	
Member, Georgian College Research Ethics Board	Sep. 2021 – December 2022
Reviewed applications for research ethics approval; designed learning resources for potential applicants	

TEACHING EXPERIENCE

Honours Bachelor of Science in Nursing program, Georgian College

NURS 1021 Pathophysiology 2, 2022 - present

NURS 1020 Anatomy & Physiology 2, 2022 - present

NURS 1017 Pathophysiology 1, 2022 - present

NURS 1016 Anatomy & Physiology 1, 2022 - present

Pre-Health program

CHEM 1008 Chemistry for Health and Science 1, 2013 - 2016

CHEM 1009 Chemistry for Health and Science 2, 2014 - 2016

Honours Bachelor of Science program, University of Windsor

CHEM 2300 Introductory Organic Chemistry, 2004 – 2010

CHEM 2310 Introductory Organic Chemistry II, 2004 – 2010

CHEM 3310 Intermediate Organic Chemistry, 2004 – 2010

CHEM 4308 Special Topics in Organic Chemistry, 2004 – 2010

CHEM 4900 Research, 2004 – 2010

Masters of Science program, University of Windsor

CHEM 8328 Advanced Topics in Organic Chemistry, 2004 – 2010

CHEM 8970 Master's Thesis, 2004 – 2010

Doctor of Philosophy program, University of Windsor

CHEM 9980 Doctoral Dissertation, 2004 – 2010

SCHOLARSHIP

SCHOLARSHIP OF DISCOVERY

Research Studies (2024-2017 only)

Using Virtual Reality to Teach Anatomy: Can It Help Improve Motivation and Learning Gains in College Students; ran the study as one component of a project funded by Future Skills Canada (FSC), Shock-Proofing the Future of Work: Skills Innovation Challenge Grant (2021–2023). Not a named investigator on the grant.

SCHOLARSHIP OF TEACHING

Thadani, A. (2024). Development of an online platform for the delivery of customized next generation NCLEX questions for RN students.

- A web-based platform was developed through JavaScript programming to deliver tailored, specific NGN questions in the A&P and Pathophysiology courses in the HBSN program

PATENTS

United States

- Rawal, V. H., Huang, Y., Unni, A. K., & Thadani, A. N. (2007). *Methods of performing cycloadditions, reaction mixtures, and methods of performing asymmetric catalytic reactions* (U.S. Patent No. 7,230,125). U.S. Patent and Trademark Office.
- Thadani, A. N., & Dhudshia, B. (2012). *Methods of preparing tertiary carbinamine compounds* (U.S. Patent No. 8,143,451). U.S. Patent and Trademark Office.
- Thadani, A. N., & Dhudshia, B. (2013). *Methods of preparing secondary carbinamine compounds with boronic acids* (U.S. Patent No. 8,350,047). U.S. Patent and Trademark Office.
- Thadani, A. N., & Dhudshia, B. (2013). *Methods of preparing primary, secondary and tertiary carbinamine compounds in the presence of ammonia* (U.S. Patent No. 8,383,859). U.S. Patent and Trademark Office.
- Rawal, V. H., Huang, Y., Unni, A. K., & Thadani, A. N. (2013). *Methods of performing cycloadditions, reaction mixtures, and methods of performing asymmetric catalytic reactions* (U.S. Patent No. 8,513,442). U.S. Patent and Trademark Office.
- Thadani, A. N., Ntaganda, R., & Beshai, M. M. (2014). *Chiral acyclic diaminocarbene ligands, precursors therefore and their use in organic synthesis reactions* (U.S. Patent No. 8,759,541). U.S. Patent and Trademark Office.

Canada

- Beshai, M. M., Thadani, A. N., & Ntaganda, R. (2015). *Chiral acyclic diaminocarbene ligands, precursors therefore and their use in organic synthesis reactions* (Canadian Patent No. 2,730,307). Canadian Intellectual Property Office.
- Thadani, A. N., & Dhudshia, B. (2008). *Methods of preparing tertiary carbinamine compounds* (Canadian Patent Application No. 2,605,611). Canadian Intellectual Property Office. Status: not granted (deemed abandoned).

DEVELOPMENT OF CURRICULUM, COURSES, AND COURSE MATERIALS

Curriculum

Development of the HBSN curriculum at Georgian College using an integrated and unified framework. Program learning outcomes were carefully created, and specific course-based learning outcomes were subsequently developed to support them. The program was approved by the CNO and successfully launched in Fall 2022.

Academic Courses Developed (2024 – 2017 only)

NURS 1016 Anatomy & Physiology 1

Developed the course and all associated learning resources and assessment based on an open educational resource (OER) textbook from OpenStax.

NURS 1020 Anatomy & Physiology 2

Developed the course and all associated learning resources and assessment based on an OER textbook from OpenStax.

NURS 1017 Pathophysiology 1

Developed the course and all associated learning resources and assessment based on publicly available, reliable, and validated data sources.

NURS 1021 Pathophysiology 2

Developed the course and all associated learning resources and assessment based on publicly available, reliable, and validated data sources.

NURS 2020 Advanced Pathophysiology and Microbiology

Co-developed the course. Developed all of the current Pathophysiology content (e.g., recorded videos, slides), together with its associated learning resources and assessment, based on publicly available, reliable, and validated data sources; this content remains in use. The Microbiology component uses an OER textbook. The course is taught by another instructor.
